Fire Chief's Report

Stats – We had some staffing challenges in February. Response times overall were okay but I really want us to do better. These are unaudited times as well since our record management system is currently undergoing a software upgrade.

Community presentations – FHHA on March 3rd. Went well, Jim Reinhardt presented at the CHIP rollout at the Senior Center and from what I hear that went really well.

Wellness Initiative – We are looking at an ILA with South Snohomish County F&R for annual physicals. They have a PA on staff who performs physicals for firefighters. He is an independent contractor with them. There would be a small annual fee, around \$500, to use their facilities for the physicals. The PA bills the insurance company for the physical so our cost will be minimal. He met with the firefighters today and it sounds like everyone is on board with the process.

Chief OOT – NWLS March 6th – 11th. Very good conference. Quite a few Commissioners were there. Mostly Law Enforcement but a lot of very insightful presentations. I did talk to one architectural firm that was present and someone from their Seattle office is going to be calling. I would like to have them come up and give a presentation to the Board on what they can provide. I did have the opportunity to look at some of their work and it is what we are looking for. They also do station location analysis which is something I don't think we need. A ballpark estimate, my opinion only, is that it will cost \$5-\$10,000 per station. Probably somewhere in the middle since we don't need the location analysis.
